

# Tesla, Heaven Nine Eleven

Tell me why there so much pain today  
Cause taking lives is for the gain or so they say  
I can't believe it but they feel this way  
And that's the way of the world  
Tell me why it takes a tragedy to see  
To wake us up and bring us down on to our knees  
With all the people suffering with diseases

And that the way  
That's the way  
That's the way of the world

As the world crashes down  
Heavens looking better everyday  
As the sun burns the ground  
There's got to be another way  
Is our god looking down  
And does it feel everybody's pain  
As the world crashes down  
Heavens looking better every day

Teach the children what means to love  
Show them why we can never give enough  
Lets work together we can rise above

And change the ways  
Change the ways  
Change the ways of the world

As the world crashes down  
Heavens looking better everyday  
As the sky turns the ground  
There's got to be another way  
Is our god looking down  
And does it feel every body's pain  
As the world crashes down  
Heavens looking better every day

(Heaven)

As the world crashes down  
Heavens looking better everyday  
As the sun burns the ground  
There's got to be another way  
Is our god looking down  
And does it feel every body's pain  
As the world crashes down  
Heavens looking better every day

As the world crashes down  
Heavens looking better everyday  
As the sky turns the ground  
There's got to be another way  
Is our god looking down  
And does it feel every body's pain  
As the world crashes down  
Heavens looking better every day

(Heavens looking down) x3
