

Testament, Leave Me Forever

Promises you never meant to keep what I thought we had was love
Used to say I was the only one how could I be so wrong
When you chose me to be the one our life together has not begun
Manipulation, presume control the lights are broken inside my soul

Overcome by the emptiness delusions of true love
Cast into a very dark abyss crest fallen and undone
When you chose me to be the one you broke my spirit we can't go on
Insinuation it takes its toll the lights are broken inside my soul
Now I have my reason to turn my back on you
Now I don't believe in you love lies bleeding through

Everything that meant so much to me I left it all for love
I gave you all that I had to give but it wasn't good enough
I thought I loved you but it's too late you said you love me but now I hate
Dead and buried let's fill the hole the lights are broken inside my soul
Now I have my reason to turn my back on you
Now I don't believe in you love lies bleeding through

I can't get away I hope you suffer I won't let love ever drive me insane
Unleash the pain laugh as you suffer you turned our love into my ugly shame
Sick of your ways sick of the future I take my life back to live it my way
Just walk away leave me forever you can't erase all the damage you've done
