Testament, New Eyes Of Old

Psychological warfare The first step in creating a situation Dreams... of new... lies confused Lies to you will truth shine through What the rain won't wash away The sun is black with shades of gray Reflections of these stranger days Live through new eyes Die through old

New eyes... eyes... lies Conflicting worlds upon your back The weight will fate undo Seen through eyes of new... Crucify me sanctify me... now Live through new eyes Die through old

New... new eyes of old Live... dream... die

Destined to repeat... doomed to forget... Destined to repeat... doomed to forget...

Out with the old, in with the new Naive and blind a curse for our time We live our lives day by day Our hearts bleed with fear... lies It's not too late to make a change We won't survive these strange days

Crucify me... sanctify me... now Seen through new eyes die through old

New... new eyes of old... New... new eyes of old... Destined to repeat... doomed to forget... Destined to repeat... doomed to forget... New Eyes of Old New Eyes of Old
