Texas, I'll See It Through

When you touch me I feel there's nothing you can do to turn me away And I know that In the past you've had bad luck so I should help you stay

You're all I ever wanted You're all I ever needed, it's you You're all I've ever wanted And loving you's the right thing to do And I'll see it through

When I close my eyes And think of you it takes me places that I've never seen And the rain, it blows You're brushing up against my skin to wash me clean

You're all I ever wanted You're all I ever needed - it's you You're all I've ever wanted And loving you's the right thing to do And I'll see it through

I'll show you the love in my head I'll show you the love that we had I'll show you the love in my head I'll show you the love that we had

You're all I ever wanted You're all I've ever needed, it's you You're all I've ever wanted And loving you's the right thing to do

You're all I ever wanted You're all I've ever needed, it's you You're all I've ever wanted And loving you's the right thing to do And I'll see it through
