The Afters, Beautiful Love

Far away, I feel your beating heart All alone, beneath the crystal stars Staring into space, what a lonely face I'll try to find my place with you

Chorus:

What a Beautiful smile Can I stay for a while On this beautiful night We'll make everything right

My beautiful love Larger than the moon, my love for you Worlds collide, as heaven pulls us through The secret of the world is written in the stars I'm carrying your heart in mine

What a Beautiful smile Can I stay for a while On this beautiful night We'll make everything right

My beautiful love Maybe a greater thing will happen Maybe all will see Maybe our love will catch like fire As it burns through me

What a Beautiful smile Can I stay for a while On this beautiful night We'll make everything all right

My Beautiful love
