

The Answer, Come Follow Me

I got a bright sun lightin' my way
I've a woman and she's makin' my day
There's a time when you open up a page
Of your life and you're smilin'

Those lines that cross your face
They tell me a story tell me you got the time

I'd a killer it was under my skin
It dissappeared so that I'd begin
Searchin' my soul, diggin' up the earth
That had fallen through my fingers

Those lines right across your face
They're tellin' me a story have you still got the time
Have you got the time?

Come follow me
When your heads so heavy with the weight of the day
Come follow me
I can steal you while I'm on my way
Come follow me
It's a new day!
So don't swallow me down
No don't swallow me down today

See the man with his head in the sand
He's got a white lag and a gun in his hand
Its a cold wind creepin' up your back and
I know that you despise it

Those lines that are crossin' your face
They're tellin' me a story, tell me you got the time
I think you got it now

Come follow me
When your so heavy with the weight of the day
Come follow me
I'll steal you while I'm on my way
Come follow me
