

# The Audition, The Way You Move

I got this feeling in my bones  
It chills me right down to my, down to my core  
All we need now, in this game that we like to play  
Is a secret to cover our mistakes, hey  
I love the way that you move and all the things that you do  
You can take all you want from me, I love the way that you move  
I'm famished with all your love girl, I need it so  
These pains won't help me hide it  
I need to show affection in this game that we like to play  
Is a secret to cover our mistakes, hey  
I love the way that you move and all the things that you do  
You can take all you want from me, I love the way that you move  
I don't think I know what has come, come over me  
I don't think I know, no  
I don't think I know what has come over me  
I don't think I know, no, yeah [x2]  
I got this feeling in my bones  
I love the way that you move and all the things that you do  
You can take all you want from me, I love the way that you move [x2]
