

The Bears, Not Worlds Apart

a mountain range or a shining sea
don't mean a thing to a satellite
information sent and received
throughout the day and night
when will we send a message loud and clear

we're in the same boat not worlds apart
all in the same boat not worlds apart
not worlds apart

systems come and systems go
birds fly over the borderlines
people gaze at the starlit sky
searching for a sign
when will we get the message bright and clear

and i wanna learn
learn how to listen
listen to my heart

not worlds apart
