

# The Ben Taylor Band, Surround Me

Surround me  
Ben Taylor

Love surround me with all your reach  
Now while we're here alone  
Now our bodies are ocean and beach  
Blessings of waves and stones

Floating a lonely sound  
You found me  
And now that the tide is finally down  
Surround me  
Surround me  
Surround me

And love move for me  
Flow beneath the sky  
Shadows and silver cross your face  
Pools of moon at night

Weak from standing on sandy ground  
You found me  
And now that I've finally fallen down  
Surround me  
Surround me  
Surround me

Love surround me while you can  
Until these waves grow cold  
I've gone TOO DEEP, I cannot stand  
I burned before I froze

Running to save my life  
Believing you  
Now in the heat of this dreadful dry  
I'm needing you  
Surround me  
Surround me
