## The Black Crowes, By Your Side

When your lost
I am found
When you slip
I hold my ground
When I fall
Please take a bow
And when you're up
Just remember I am down

People looking for Fortune and fame They don't know That it's all the same It's like any other game You know there's a loser But it's alright

When you feel your heart is breaking When all your friends are faking When its giving and no taking I will be by your side

I've been over the hill and back Survived every kind of attack It's been a few years at that As a matter of fact

Good luck is just good luck You don't go hungry if you got pot luck I've been down But never on my knees I see the forest for the trees
