

The Black Keys, Happiness

Wait if you want to
But that won't do you no good
You're gonna hate to be the one who
Didn't do it when you could

You got to do the thing you don't want doing
Even if it's going to ruin what you had
If what you had was bad
Say the words you don't want saying
Find the nerve to stop delaying
Happiness, it isn't known to us

Worry is gonna kill you
Don't let it win in the end
Find a lover who can thrill you
Maybe you begin again

You got to do the thing you don't want doing
Even if it's going to ruin what you had
If what you had was bad
Say the words you don't want saying
Find the nerve to stop delaying
Happiness, it isn't known to us

Do the thing you don't want doing
Even if it's going to ruin what you had
If what you had was bad
Say the words you don't want saying
Find the nerve to stop delaying
Happiness, it isn't known to us

Do the thing you don't want doing
Even if it's going to ruin what you had
If what you had was bad
Say the words don't want saying
Find the nerve to stop delaying
Happiness, it isn't known to us
