

# The Black Keys, It Ain't Over

Money and love ain't no sure thing  
You live for a thrill, you die for a dream  
And when it comes around, you lay your money down  
You got a love that's a real longshot  
Breakin' the bank for your new weed spot  
And she comes around, you lay your money down

No one else for you to blame  
But when you play that losing game  
It ain't over  
So try to ease up, worried mind  
Dreams come true from time to time  
It ain't over

What are the odds if you let them go  
Win or lose, it's gonna take your soul  
And it can't turn around, lay your money down  
One up your sleeve might getcha two in your chest  
Hurt in your heart, but they know best  
And when she comes around, you lay your money down

No one else for you to blame  
But when you play that losing game  
It ain't over  
So try to ease up, worried mind  
Dreams come true from time to time  
It ain't over

No one else for you to blame  
But when you play that losing game  
It ain't over  
So try to ease up, worried mind  
Dreams come true from time to time  
It ain't over

No one else for you to blame  
But when you play that losing game  
It ain't over
