

The Blackout!, I've Got Better Things To Do Tonight

We can see through you
But we don't have x-ray eyes
We can see the truth
And set our sights upon the prize
Say what you will
We are never gonna crack
There's a time to kill
And we all know that this is it
So bang your head and close your eyes
We are about to take our lives
We are the dynamite
Demolition is our religion, so light the fuse
We are the dynamite
Demolition is our religion, so light the fuse
Don't try to run
Detonation is underway
Your ends begun
Your black skies have turned to grey
The sky will fall
Down on everything you know
You can't []
You face a mother without hope
So bang your head and close your eyes
We are about to take our lives
We are the dynamite
Demolition is our religion, so light the fuse
We are the dynamite
Demolition is our religion, so light the fuse
We are, we are the dynamite
We are, we are the dynamite
We are, we are the dynamite
We are, we are the dynamite
We are the dynamite
Demolition is our religion, so light the fuse
We are the dynamite
Demolition is our religion, so light the fuse
We are the dynamite
Demolition is our religion, so light the fuse
So light the fuse
Demolition is our religion, so light the fuse
Light the fuse
Demolition is our religion, so light the fuse
