

# The Church, Terra Nova Cain

Turn down the gravity, this is all too heavy  
I'll show you how the ancients once traveled  
They used to call this a Chevy  
Just before the continents sank, you could still go outside  
I was sitting on a hot off ramp  
She pulled up and asked me if I needed a ride

Terra nova cain I need you again  
Deep space jam on an alien terrain  
Terra nova cain I need you again  
Some for the little boys who live down the lane

I should have known there was something amiss  
She had unearthly eyes  
She had a way of sifting through your mind  
Like she'd done it to a million guys  
She said will you help with our research  
I said take me to your leader  
She put her foot down on the oscillation pedal  
She was a transdimensional speeder

Terra nova cain I need you again  
Protect me from the meteor rain  
Terra nova cain I need you again  
Put your exploratory probe right into my brain

They brought me back after thousands of years  
I hadn't aged at all  
We used to float around her weightless bedroom  
That drove me right up the wall

Terra nova cain I need you again  
You dropped me off and you've left me quite drained  
Terra nova cain I need you again  
Help me break these telekinetic chains
