

# The Coral, Something Inside Of Me

Something inside of me  
Feels like i've been wanting you forever  
There'll never be another century  
There's no time to think about the weather

When there's something inside of me  
Something inside of me  
Something inside of me  
And now i can't look back

The invisible invasion  
It's like a stranger strangled on the moor  
Into the void for now i'm gone  
Five in the morning i'll be knocking at your door

With something inside of me  
Something inside of me  
Something inside of me  
And now i can't look back

Oh please don't cut me loose  
I know you think that i'm bullet-proof  
Can't you see that it's hurting me  
What do think i'm supposed to be when

There's something inside of me  
Feels like i've been wanting you forever  
There'll never be another century  
There's no time to think about the weather

When there's something inside of me  
There's something inside of me  
Something inside of me  
And now i can't look back
