

The Cult, Born Into This

Yeah NYC
The place to be
look at all the rock heads
like you and me
push against the pavement
take it to the street
sick of all the hype now
riding on the beat

Don't let us down
Don't let us down
They're chasing ours around
all over town

Illuminate the night
pixelated fury

blank generation

knowing what the game us
never steal from us

Don't let us down
Don't let us down
They're chasing ours around
all over town
Don't let us down

Don't let us down
They're chasing ours around
all over town
Lead the way man
Drop your wall
Lead the way man
Drop your wall
Savage scene
you gotta taste the dream
stand tall
you gotta root it all

gotta let it bleed
lead the way man
drop the wall
lead the way man
drop the wall
come together
Don't let us down
Don't let us down
They're chasing ours around
all over town
Don't let us down
Don't let us down
They're chasing ours around
all over town
