The Cure, Bird mad girl

This girl has got a smile That can make me cry This girl just burns with love She's burning burning deep outside Night time night time Sets my house on fire I'll turn into the melting man I'll lose my life To feel I feel desire Oh I should feel Like a polar bear... It's impossible She flies outside this cage Singing girlmad words I keep her dark thoughts deep inside As black as stone And mad as birds Wild wild wild And never turn away Sends me all her love She sends me everything She sends me everywhere Oh I could be A polar bear... It's impossible I try to talk The sky oges red I forget So fill my head With some of this Some of that Some of every word she said Oh I should be A polar bear... But it's impossible
