

# The Dingeess, The World's Last Night

Bring down the lightning from the sky  
Bring cross a vision every eye  
Leave all but righteousness for man has made  
A mishap out of me  
Words been etched into our hearts  
But soon our minds grow far apart  
Mind blown society has made desolution common speech

Trouble come like the world's last night  
Combat turn fight to life

The prince of the power of the air  
Flying phantom ship, binding children in fear  
The days are darkeninng, shine like rays  
Sparked by the solar flare  
Neither death nor life nor angel  
No height of heaven or no depth of hell  
No created thing now or soon to come can steal away

We don't want the end, we want the beginning  
We don't want destruction, but it comes before the new beginning  
We don't want the end, we want the beginning  
We don't want destruction but we know it comes before a new creation
