

# The Doors, It Slipped My Mind

You know it just done slipped my mind  
Just done slipped my mind  
Just so hard to find  
You know it just done slipped my mind  
I left my body somewhere down the line  
It's just so easy to lose track of time  
You know it just done slipped my mind  
You know it just done slipped my mind

It wouldn't matter but it's time to meditate  
You know it just done slipped my mind  
My memories undefined  
They must have spiked my wine  
Because it just done slipped my mind

My mind and body are still out of tune  
I hope they run into each other real soon  
You know it just done slipped my mind  
You know it just done slipped my mind  
I wouldn't mind but it's cold here on the moon  
You know it just done slipped my mind

You know it just done slipped my mind  
My memories undefined  
You know it just done slipped my mind  
They must have spiked my wine  
My mind and body are still out of tune  
I hope they run into each other real soon  
You know it just done slipped my mind  
You know it just done slipped my mind

I wouldn't mind but it's cold here on the moon  
You know it just done slipped my mind  
You know it just done slipped my mind
