

# The Fold, Medicine

Let's skip to the point, let's skip to this condition  
Let's skip to the point, let's skip to this condition

Here we go again we're takin medicine to take the pain away  
To get this gone is what I need so badly  
But they put the prize behind my pride, to save one is to kill the other  
What will you think of me now? What will you think of me now?

Put your favorite record on, go straight to your favorite song  
I've seen you laugh and cry now I wanna see you dance

Let's skip to the point, let's skip to this condition

Here we go again this day's been heavy as a hospital  
I know you never wanna learn bad news, you never did have the time  
But out of the corner of my eye you turn and say  
That you can get on up or you can get on down but you cannot just stand around

What will they think of us now?  
Now that all that I can do is try to make this better

Put your favorite record on, go straight to your favorite song  
I've seen you laugh and cry now I wanna see you dance  
Let's throw this day away, let's give this another chance  
I've seen you laugh and cry now I wanna see you dance (I wanna see you dance)

You can get on up or you can get on down but you cannot just stand around  
You can get on up or you can get on down but you cannot just stand around  
You can get on up or you can get on down but you cannot just stand around  
You can get on up or you can get on down but you cannot just stand around  
You can get on up or you can get on down but you cannot just stand there

Put your favorite record on, go straight to your favorite song  
I've seen you laugh and cry now I wanna see you dance  
Put your favorite record on, go straight to your favorite song  
I've seen you laugh and cry now I wanna see you dance

Let's throw this day away, let's give this another chance  
I've seen you laugh and cry, I wanna see you dance (I wanna see you dance)
