

The Jayhawks, What world are you living in?

You and I've been this road together
And every now and then you've lost your way
But I've been run before
You opened up my door
But you crawled back home again
Chorus: What world are you living in ?
Where have you gone ?
And where have you been ?
What made you think you will get
My love and respect
By walking back in ?
We can probably be playing this game forever
The trouble is, you're tougher than you look
And after all this time
I know you're no friend of mine
And there is no way I could win
(Chorus)
Well, I've been strong before
Watched you walking out my door
Now you're calling out my name
(Chorus) *2
