

The Moody Blues, Lean On Me (Tonight)

Lean on me
I'll be there
Whenever you need someone
To share in every prayer
In every dream
You've left somewhere
'Till tomorrow
Will be just like it was when we were young
'Cos tonight
I'm gonna take you where
I've never taken you before

Lean on me
I'm every where
Where ever you look I'll be
Forever yours
The northern lights
The southern cross
I'll give to you
'Till tomorrow
Will be just like it was when we were young
'Cos tonight
I'm gonna take you where
I've never taken you before

If you're lonely
You know where you can find me
You know there's no escape when you are on your own
And if you're worried
And you can see your world slip through your fingers
I'll reach out for you in my heart
There's no more dancing in the dark

You're not alone
Tomorrow
Will be just like it was when we were young
'Cos tonight
I'm gonna take you where
I've never taken you before

Will be just like it was when we were young
Tonight I'm gonna take you where
I've never taken you before
Will be just like it was when we were young
