

The Notwist, Gravity

i hear it's colder where we live now
the same world, but better somewhere else
i see the planets spinning faster
or is my body too slow
i don't know, i don't know
don't want to live somewhere else
gravity you won't get me
old gravity you won't get me

bring in the savage
bring in the loud
and fill our house with all
the holy astronauts
bring in the trouble
that's where we live.
up on the roof a prayer
for love disbelief.
