

The Pentangle, Watch The Stars

Watch the star see how they roam
Watch the star see how they roam
You know the stars roam down
At the setting of the sun
Watch the star see how they roam

Watch the wind see how it blows
Watch the wind see how it blows
You know the wind shall blows
When the sun goes down
Watch the wind see how it blows

Watch the moons see how it glows
Watch the moons see how it glows
You know the moon is gonna glow
When when the sun goes down
Watch the moons see how it glows

Watch the star see how they roam
Watch the star see how they roam
You know the star roam down
At the setting of the sun
Watch the star see how they roam
See how they roam
See how they roam
