

The Radios, Teardrops

Something in the words you never said
makes me feel I ain't seen nothing yet
catch me now I'm falling,
Hear the angels calling,
Calling somewhere deep inside my head

Close encounters of a different kind
Open up the part that's hidden inside
Many hearts get broken
While words are left unspoken
leaving nothing but a worried mind

We could flow like teardrops on the ocean
We could flow like water to the sea
It may sound unclever
We'd last forever
If you want to stay with me
If you want to stay with me

Never now for sure what's coming up
Sad the echo-beat will never stop
You're the one and only
But if you leave me lonely
You might as well let all the curtains drop

We could flow like teardrops on the ocean
We could flow like water to the sea
It may sound unclever
We'd last forever
If you want to stay with me
If you want to stay with me

Instrumental solo

We could flow like teardrops on the ocean
We could flow like water to the sea
It may sound unclever
We'd last forever
If you want to stay with me

If you'd just lay love on me
