

# The Smithereens, Evening Dress

I've been waiting for you all my life  
And now that you are here I can't believe  
How wonderful it is to be here by your side  
To see you in the light

In your evening dress tonight

Everytime I think you've gone away  
There's only one thing left that's on my mind  
And everytime I think about your pretty face  
My arms around you tight

In your evening dress tonight  
In your evening dress tonight

Time after time you put up with me  
Time after time I refused to see  
Time after time you are in misery  
But what more can I do?

In your evening dress tonight  
In your evening dress tonight

I've been thinking about you all day long  
And now that you are here I can't believe  
And now I know that I would give up everything  
To see you in the light  
In your evening dress tonight  
-you take it all back and then you throw it away
