

The Strangers, Don't Bring Harry

Harry and me we live in a dream
With a friend like him I don't need enemies

I don't know where morning is
It might not come today
That's the trouble when Harry's around
He forces me to play

I should have refused to meet this midnight cheat
He likes to prey on my mind with his own special treat

I don't know when morning comes,
It might not come today.
Harry likes to play all night
I'll do what Harry says

Don't bring Harry I don't need him around
Don't bring Harry I don't need him around

Ah you've met Harry - I can see by your eyes
If once there was life there, now there's compromise

Harry is a beast of luxury
He just wants my body and soul - leaves the bones behind

Ah you've met Harry - I can see by your eyes
If once there was action - Now there is no life

Don't bring Harry I don't need him around
Don't bring Harry I don't need him around
