

The Thorns, I Set The World On Fire

Hundred miles an hour down a twisting turning road
Bottled up. shaken up, ready to explode

I set the world on fire
I set the world on fire

Tired of making promises I know I won't keep
Over you and what you do
Tired of being deceived

I set the world on fire
You can't put it out putting me down
I set the world on fire
So now you can watch me let it burn down
I set the world on fire

Let it all burn down, ah
All burn down, down

Tired of making promises I know I won't keep
Tired of making promises I know I won't keep

I set the world on fire
Let it all burn down
I set the world on fire
Let it all burn down
I set the world on fire
You can't put it out putting me down
I set the world on fire
Let it all burn down
I set the world on fire
Now you can watch me let it burn down
