

The Vaccines, Heartbreak Kid

You heavy hitter
When you cried on the sky, you made it glitter
The moon in your eye
You were childlike
But you didn't care
So now you scream it
Saying this is goodbye' but you don't mean it
Always calling your bluff
Why believe it?
There isn't the time

But people like us think we got all time in the world

Let your heart break kid
Let your heart break kid
Till you're feeling it
Let your heart break kid

Oh you never thought they'd leave you but they did
Now everybody calls you the heartbreak kid
And you can't believe they really called it quits
And you never thought that you would be the heartbreak kid

You got undressed
You stepped into the fire out of protest
Now everything burns
And you blew it
It was right on your lips
So now you're waiting
It's a function of time oscillating
You've got nowhere to go
When you're growing
The road never ends

But people like us think we got all time in the world

Let your heart break kid
Let your heart break kid
Till you're feeling it
Let your heart break kid

Oh you never thought they'd leave you but they did
Now everybody calls you the heartbreak kid
And you can't believe they really called it quits
And you never thought that you would be the heartbreak kid

People like us think we got all the time in the world
But you ain't got all the time in the world

Let your heart break kid
Let your heart break kid
Till you're feeling it
Let your heart break kid

Oh you never thought they'd leave you but they did
Now everybody calls you the heartbreak kid
And you can't believe they really called it quits
And you never thought that you would be the heartbreak kid
