

The Virgins, Travel Express

Saw you in a music video
Admit my heart slipped down to my chest
I should have tensions before i?
With the head dyed black and you living

Calling the singer, clip the microphone
His lips so tight, his eyes were so sad
He held a flower underneath your nose
That dirty look you could've patented it

Now let your light shine through your night window
And the world let your love look my way
You could plant a kiss on your reflection
And tell yourself it travel express from me
Travel express from me

In the seat in the back of a dime
I saw a side of your face through your head
Your husband smiled and said he heard of me
I shoot his hands and then I change instead
I guess the page is gonna turn some more
Will be all wrinkled and baggy clothes
I search the channels with the oldies on
Remember listen you might be out close

Now let your light shine through your night window
And the world let your love looks my way
You could plant a kiss on your reflection
And tell yourself it travel express from me
Travel express from me

The fast first express whispering wishes
Look out for yourself and you?ll be alright
The stars fall at you
The planets surround you
Take care of yourself and you?ll be just fine

Look out for yourself ?cause you?ll be alright
Travel express from me /4x
