

Therapy?, Nobody Here But Us

Get out of bed with a pain in your guts
Reluctant riser, wondering who you trust
The mirror tosses you two jaded eyes

You're curled up in your bitter retreat
You're all burned out, so defeated and beat
Down to earth back on Civvy Street

Now there's nobody here but us
Nobody here but us
You push too hard just to get what you want
Now there's nobody here but us, anymore

From VIP to RIP
You're going down and you wanna take me
Funny how you used to be so sweet

Now there's nobody here but us
Nobody here but us
You push too hard just to get what you want
Now there's nobody here but us
Nobody here but us, anymore

The dust gathers on the drivers seat
Your best memories are stuck on repeat
You're sucked in, you're sinking deeper

Now there's nobody here but us
Nobody here but us
You push too hard just to get what you want
Now there's nobody here but us
And there is nobody here but us
Nobody here but us
You push too hard just to get what you want
Now there's nobody here but us
Nobody here but us, anymore
