

# Thousand Foot Krutch, The Flame In All Of Us

This world has taken me by storm  
And makes me feel like running.  
This place is making me transform  
Until I feel like nothing.

It's the strength in you and me  
That surrounds everything  
The way you look out for me  
The way you burn

It's the flame in all of us the same,  
It makes us feel it's flame  
In all of us the same  
It makes us feel it.

We are the youth of yesterday,  
We've brought you pain and sorrow.  
That's what they say, but they pave the way.  
We are the new tomorrow.

It's the strength in you and me  
That surrounds everything  
The way you look after me  
The way you burn

It's the flame in all of us the same,  
It makes us feel it's flame  
In all of us the same  
It makes us feel it.

It's the flame in all of us the same,  
It makes us feel it's flame  
In all of us the same  
It makes us feel it.

Its the flame in all of us  
Makes the change in all of us  
Takes the blame in all of us  
And still keeps it alive

Its the flame in all of us  
Makes the change in all of us  
Takes the blame in all of us  
And still keeps it alive
