

# Tiger Army, Last Night

Have you ever thought about forever?  
I never thought that it could last for so long  
Have you ever seen the sky falling?

Something's gone wrong, or perhaps it's meant to be  
But it can't go on, this I can feel in my bones  
It's twilight time, have you ever heard the Devil calling?

I'll send you 13 black roses  
The end of the world will come at night  
Millions of years have come to this  
Tonight, tonight, tonight

Tonight's the night, that the world ends  
Tonight's the night, the world ends  
Tonight's the night, for the world ends tonight

It has been written in books of long ago  
That the day shall come when the wicked shall fall  
But as the day comes so shall the night, and so ends it all  
I'll always remember the days of you and me  
Final embrace as a bloated red sun sets  
But most of all the moon, like the ship sailing into eternity

I'll send you 13 black roses  
The end of the world will come at night  
Millions of years have come to this  
Tonight, tonight, tonight  
Goodbye
