

Tim McGraw, Maybe We Should Just Sleep On It

Maybe We Should Just Sleep On It

I got an empty feelin' when that moving van pulled up
It got a little emptier as I watched them fill that truck
And when they carried out your clothes It took my breath away
Now they're headed for that bed
The thought keeps runnin' though my head

Chorus

Baby, maybe, we should just sleep on it tonight
And give our hearts just one more chance to change our minds
I could be wrong but goodbye just don't feel right
So baby, maybe, we should just sleep on it tonight

I'll pay them boys to stop right now
And leave that truck out on the curb

The TV and the phone's packed up
So we won't be disturbed

There's not a light left in this room Just a shadow of a doubt
So let's make sure we don't give up

Before we've thought this through enough

Repeat Chorus

Baby, maybe, we should just sleep on it tonight
And give our hearts just one more chance to change our minds

I could be wrong but goodbye just don't feel right

So baby, maybe Baby, maybe Baby, maybe

We should just sleep on it

Tonight
