

# Tim McGraw, Sleep On It

I got an empty feelin' when that movin' van pulled up  
It got a whole lot emptier as I watched them fill that truck  
And when they carried out your clothes it took my breath away  
now they're headed for that bed, a thought keeps running through my head  
refrain:

Baby, maybe we should just sleep on it tonight  
and give our hearts just one more chance to change our minds  
I could be wrong but goodbye just don't feel right  
so baby, maybe, we should just sleep on it tonight  
I'll pay them boys to stop right now and leave the truck out on the curb  
the tv and the phone's packed up, so we won't be disturbed  
there's not a light left in this room just a shadow of a doubt  
so let's make sure we don't give up before we've thought this through enough  
refrain

Baby, maybe we should just sleep on it tonight  
and give our hearts just one more chance to change our minds  
I could be wrong but goodbye just don't feel right  
so baby, maybe, we should just sleep on it tonight  
Baby, maybe we should just sleep on it tonight  
and give our hearts just one more chance to change our minds  
I could be wrong but goodbye just don't feel right  
so baby, maybe (3x)  
we should just sleep on it tonight
