Time Tells All, The Dream

Catching kisses all over the place
I'm cynical and paranoid
You've got a voice but I've got words in a song
I'm not the first one to make the move
Don't love the player, love the game
How can I move to the future if I haven't left the past?

Cause everybody wants to look good
We've all got something to prove

Late nights up and the lights go out
What you don't know won't kill you
I'll pour the glass if you just drink from the cup

Cause everybody wants to look good
We've all got something to prove

Let's go over the top
Its better than going underneath we want to go
If there was a line you could not cross
You'd ride on top of it and give everything up

We're on a mission we can't just sit around
We've gotta get up, gotta make something of it
Here we go again, it's time to make a move
We've gotta get up, gotta make something of it

Let's go over the top
Its better than going underneath we want to go
(Set the standard raise the bar again, take the path only few have taken singing ooh ooh)
If there was a line you could not cross
You'd ride on top of it and give everything up

Let's go over the top
Its better than going underneath we want to go
(Set the standard raise the bar again, take the path only few have taken singing ooh ooh)
If there was a line you could not cross
You'd ride on top of it and give everything up
