

Tina Turner, Talk To My Heart

(Johnny Douglas & Graham Lyle)

I found a friend, someone to help me
And a place I can be myself when I'm in trouble now
I've lost it and I don't know how
I come to you 'cause you can show me
Get me back to the me I know with a remedy
Baby I need your therapy
With your healing kiss you know how to make my mind relax
I will listen to the words you say and just lie back

[Chorus:]

Talk to my heart that's where real talkin' starts
Words of love that cut straight to my heart
Reach out and touch, so few words say so much
I can hear you when you tell it like it is
When you talk straight to my heart

I guess it shows I need attention
Somehow you're asking all the right questions and I've gotta say
What's been on my mind these days
And I know you know just how to make my mind react
When it's coming straight from you that's my first point of contact

[Chorus]

I'm bad at making decisions
But being alone with you just feels so right, feels so right
I'm losing my inhibitions
With every minute I share with you tonight, share it with you tonight

[Chorus]
