

# Toadies, I Come From The Water

I come from the water  
I crawled upon the shore  
I left my brothers there  
I got what I came for

I sucked that hot air in  
And rolled upon the sand  
Emerged beneath the sun  
To be a man.

I come from the water  
I come from the water  
That weren't no easy thing  
It's more than nature  
It's like my destiny

I stood upon these legs  
And held my head up high  
Emerged beneath the sun  
To start a new life

I come from the water  
Life in the desert  
Just to be together  
The sand forever  
The same forever  
It moves beneath me  
It pulls my body  
My pulse beats hotter  
So far from the water

I love to see the sun  
In spite of all it's done  
I pray for shade and rain  
I pray to live again  
I come from the water
