

# Toadies, What We Have We Steal

Shut down the disease  
Brush aside stand up off your knees  
Tip the scales  
Spin me some horrible beautiful tales  
Cause now you're weak and you're tired and you're lonely  
You can't see what could be yours for keeps all the while

You can take what you want  
But you're not so nice anymore  
Everything we have we steal

Run your fingers over me  
Pull away the skin uncover the disease  
With a weakness and a tenderness we kiss  
Consuming each other all over again

You can take what you want  
But you're not so nice anymore  
Everything we have we steal  
We steal  
We steal  
Yeah, we steal

You can take what you want  
But you're not so nice anymore  
Everything we have we steal

Yeah, you can take what you want  
But you're not so nice anymore  
You're not so nice anymore  
You're not so nice anymore  
Everything we have we steal  
We steal  
We steal  
Yeah, we steal
