

Tom Petty & The Heartbreakers, Built To Last

Somewhere out my doorway
Somewhere down my block
I can hear her heartbeat
In rhythm with my clock

I want her more than diamonds
I want her more than gold
I want her more than anything
Anyone could hold

We were built to last
On until forever
The world is changing fast
Oh, but our love was built to last

She has followed me down
Along some empty streets
She has followed me where
The rain would fall in sheets

And I know I've been changin'
Changin' like the wind
I was feeling burned out
I got tired of it

We were built to last
On until forever
The world is changing fast
Oh, but our love was built to last

Oh...whoa...
Oh...whoa...

So come to me my darlin'
Hold me while I sleep
I know you feel lost
But you're not in too deep

We were built to last
On until forever
The world is changing fast
Oh, but our love was built to last
Yeah, our love was built to last
