

Tony Hadley, Dance With Me

Who now am I to fall in love
At first sight
Please save your love for me tonight
And take this wild and endless flight

Just come in from the cold
And your soul will be dissolved
And we will glide
Like two angels on this solitary night

So won't you dance with me
Just dance with me
A picture in my heart
Dance with me just dance with me
A paradise by far
So won't you dance with me
Just dance with me
Embrace this serenade
Dance with me just dance with me
Two people who were made
To fall in love

Oh how just when she smiles
With all that's warm and so bright
Captivated hearts (in one flame)
Now let this passion dance
