

Tori Amos, Beauty Of Speed

We climbed through the canopy
Only to find a crack in our gauge
The last thing a look you gave
And then we tumbled out of control
I tried to strike a deal with the universe
Me and my deals with the universe

Smacked up side of the head
With the harsh of daylight
So simple last evening
The beauty of speed
Afraid we've been changing
In a way I wasn't loving
Feel those colors changing
The beauty of speed
I'm coming back for more
Out of a black and white world
Past a shooting star
The beauty of speed
See the colors changing
See the colors changing
See the colors changing

Even still I was built
To tolerate your temperature
It fluctuates so I must break
Through the bleak of winter
Through your latest barrier
Your latest barrier

Smacked up side of the head
With the harsh of daylight
So simple last evening
The beauty of speed
Afraid we've been changing
In a way I wasn't loving
Feel those colors changing
The beauty of speed
I'm coming back for more
Out of my black and white world
Past a shooting star
The beauty of speed
See the colors changing
See the colors changing
See the colors changing

See the colors changing
See the colors changing
See the colors changing
See the colors changing, baby
Changing, baby
Changing I see
See the colors changing

Afraid we've been changing
In a way I wasn't loving
Feel these colors changing
The beauty of speed
