

Tosteer, Shattered mind

Something is about to happen
Something is about to get them
No one knows what it's like
No one knows what is out there
Something is really gonna happen
Something is really gonna get them
No one knows what it's like
No one knows if it can hurt them
Hard to find it
Or believe it
Shocks our minds as
We conceive it
When it's got here
There's no life for us
Soothing pain is all you want now
Mending heart is all you need now
Now you know what it's like
Shattered mind is all you've got now
Soothing pain is all you want now
Mending heart is all you need now
Now you know what it's like
You've been hit and you are dead now
Hard to find it
Or believe it
Shocks our minds as
We conceive it
When it's got here
There's no life for us
