

# Toto, BURN

I can hear you cry  
From behind the door of your troubled mind  
You locked yourself inside  
A lonely prison of your own design

Do you feel the burn?  
Does it ease the pain when you close your eyes?  
Do you give in to your desire  
Or live inside your tower of endless nights

I would burn it down for love  
Watch the smoke roll out of my broken heart  
Burn it down for love  
There's no force on earth can keep us apart

Take my hand I'll lead the way  
Through the darkest parts of these castle halls  
No more masquerade  
We'll fight ghosts and demons  
And we'll breach these walls

I know you're still afraid  
I'll guide you through these crumbling spires  
Trust in me to light our way  
With these glowing flames that only you inspire

I would burn it down for love  
Watch the smoke roll out of my broken heart  
Burn it down for love  
There's no force on earth can keep us apart

Pure of heart and innocent  
I can hear your voice from afar  
I've had my share of loneliness  
Can you hear me now, where you are

I would burn it down for love  
Watch the smoke roll out of my broken heart  
Burn it down for love  
There's no force on earth can keep us apart  
I would burn it down for love....
