

Toto, We Made It

Bad timing for love: you caught me on your birthday
I could feel your heart break into a hundred pieces
We were too torn apart, now it seems so senseless
And if we're clever, we'll put it together, it may be forever

[Chorus:]

We made it, made it, made it before, I know that we can make it again
We made it, made it, made it before, I know that we can make it again

Down on my luck, you arrived just in time, my angel
Thought you'd given me up, like a rhyme that needs no reason
I want you enough to keep my life untangled
If we're clever, we'll put it together, 'cos it may be forever

[Repeat chorus]

[Instrumental break]

I want you enough to keep my life untangled
If we're clever, we'll put it together, 'cos it may be forever

[Repeat chorus two times]

If ever we'll make it, we're gonna make it girl
And I know we can take it, we got to take it, girl

If ever we can make it, we gotta make it
And I know we can take it...
