

# Tracy Lawrence, Just You And Me

Baby take off your coat we ain't in no hurry  
I see the fear in your eyes but girl don't you worry  
I'll keep the candles lit all night so you'll know everything's all right  
We've got everything we need and it's just you and me  
I've got the covers turned down come lay here beside me  
Oh baby let down your hair and your doubts about me  
I'm gonna make you feel tonight like you've never felt in your life  
We've got everything we need and it's just you and me  
There ain't no one around and the only sound is your heart beating next to mine  
Cast your fears in the fire give into your desire put your faith into me  
Cause I've got everything we need and it's just you and me  
[ guitar ]  
There ain't no one around...  
Oh baby let down your hair and your doubts about me
