

# Transatlantic, We All Need Some Light

Some people think  
Think they have none  
They might as well stay down  
Running in circles  
Like bulls in a ring  
'Til the sword finds it's way down

While the creep beats the rap on appeal  
And the cop who can't stop  
Shows the kids how to steal

And we all need some light now  
We all need some light now  
Yes, we all need some light now  
Turn on your light and wash the darkness away

Hey you on the brink  
Waiting to fall  
To become human surplus  
The movie's still shooting  
You might still get the roll  
And man it's all just a circus

But the clown left town long ago  
Maybe he'll come back and give us a show

And we all need some light now  
We all need some light now  
Yes, we all need some light now  
Turn on your light and wash the darkness away

And we all need some light now  
We all need some light now  
Yes, we all need some light now  
Turn on your light and wash the darkness away
