

Treble Charger, China In Your Hands / Fusion

I'm China in your hand
Can't you give it one more try
China in your hand
Can't you try to understand

Another lonely night
Without you in my arms
Wish I could hold you in tight
And keep you safe from harm

Another lonely night
the pain is in the air
If only I knew for sure
One day you would be there

I'm china in your hand
Can't you give it one more try
China in your hand
Can't you try to understand

I need you here I need you now
I need you right here by my side
I need to know how much you care
I'm China in your hand

Another raining day
With mystical impressions
I give the world to be
One of your possessions

Romantic melodies 've been played by the wind
I see a passion overflow and deep with it

I'm china in your hand
Can't you give it one more try
China in your hand
Can't you try to understand

I need you here I need you now
I need you right here by my side
I need to know how much you care
I'm China in your hand

Why can't I be a part of your life
I need to know, don't you need me there
I'm China in your hand
China in your hand

I need you here, I need you now
I need you right here by my side
I need to know how much you care
I'm china in your hand

I'm china in your hand
Can't you give it one more try
China in your hand
Can't you try to understand

I need you here, I need you now
I need you right here by my side
I need to know how much you care
I'm China in your hand

China in your hand

Can't you try to understand
