

Trivium, No Way Back Just Through

I am the blight
I am the emptiness
I am the night that comes for you

You can't escape
'Cause I am everywhere
My immanence
Surrounding you

(Going nowhere)
You're falling further
(Falling further)
You're falling further down
(Going nowhere)
You're falling further
(Falling further)
You're falling further down

Divine permeation of everything you are
There's no way back, no way back - just through

There's no way back
No way back
No way back - just through
There's no way back
No way back
No way back - just through

I am the curse
I am the ambience
The sacred sounds
That call for you
There is no peace
This is a reckoning
Your ignorance
Destroying you

(Going nowhere)
You're falling further
(Falling further)
You're falling further down
(Going nowhere)
You're falling further
(Falling further)
You're falling further down
Divine permeation of everything you are
There's no way back, no way back - just through

There's no way back
No way back
No way back - just through
There's no way back
No way back
No way back - just through

I will not live to see the final justice
But I'll be the one that comes for you

I am the blight
I am the emptiness
I am the night that comes for you

You can't escape
'Cause I am everywhere
My immanence
Surrounding you

There's no way back
No way back
No way back - just through
There's no way back
No way back
No way back - just through
(No way back - just through)
No way back - just through
No way back
