

# Tryad, Our Lives Change

(I don't know what they've done to get there)

One little light  
Completely fills the night

Just one little life  
Makes this whole world alive

All like waves  
All like waves  
All like waves

One little life  
Makes this whole world alive

All like waves (I don't know what they've done....)  
We all rise and fall away

Our lives change

Lives change  
Lives change
